

## **Assumptions**

- 1. Stable sorting for sort command**
- 2. New line appended to output for call command**
- 3. Date assumes that the numbers are correct, only the format is checked**
- 4. PWD assumes that `System.property("user.dir")` works correctly.**
- 5. Cat application**
  - a. if closing file stream is unsuccessful behavior is undefined**
  - b. If one of the files doesn't exist, exception is thrown**
  - c. New line between file contents**
  - d. Behavior of null outputStream is to throw exception**
